

ESN - one of the biggest interdisciplinary student associations in Europe

Founded in 1990 the Erasmus Student Network (ESN) is already present in 290 Higher Education Institutions from 33 countries

Working on a volunteer basis, ESN is one of the biggest interdisciplinary student associations in Europe for supporting and developing student exchange, with an average annual growth rate of 12,3% since its foundation.

From its three levels of operation, Local, National and International, ESN works for the creation of a more mobile and flexible education environment by supporting and developing the student exchange from different levels, and providing an intercultural experience also to those students who cannot access a period abroad. ESN also works with the reintegration of homecoming students and contributes to the evaluation of different exchange programmes.

Erasmus Student Network is in constant cooperation with the European Institutions and other relevant bodies and policy makers in the ambitious project of creating and fostering the development of a society based upon mutual knowledge, respect, trust and therefore peace among individuals, groups, communities, peoples and countries.

ESN strives for a world where increasingly more young people will be in the condition to access, either by moving or by staying at home, the opportunities of personal growth offered by an international experience in Higher Education.

From its office in Brussels, ESN International is developing several ambitious projects such as the Survey on the exchange students' issues, ESN Card, PRIME project and many others.
